

# **Club Management System**

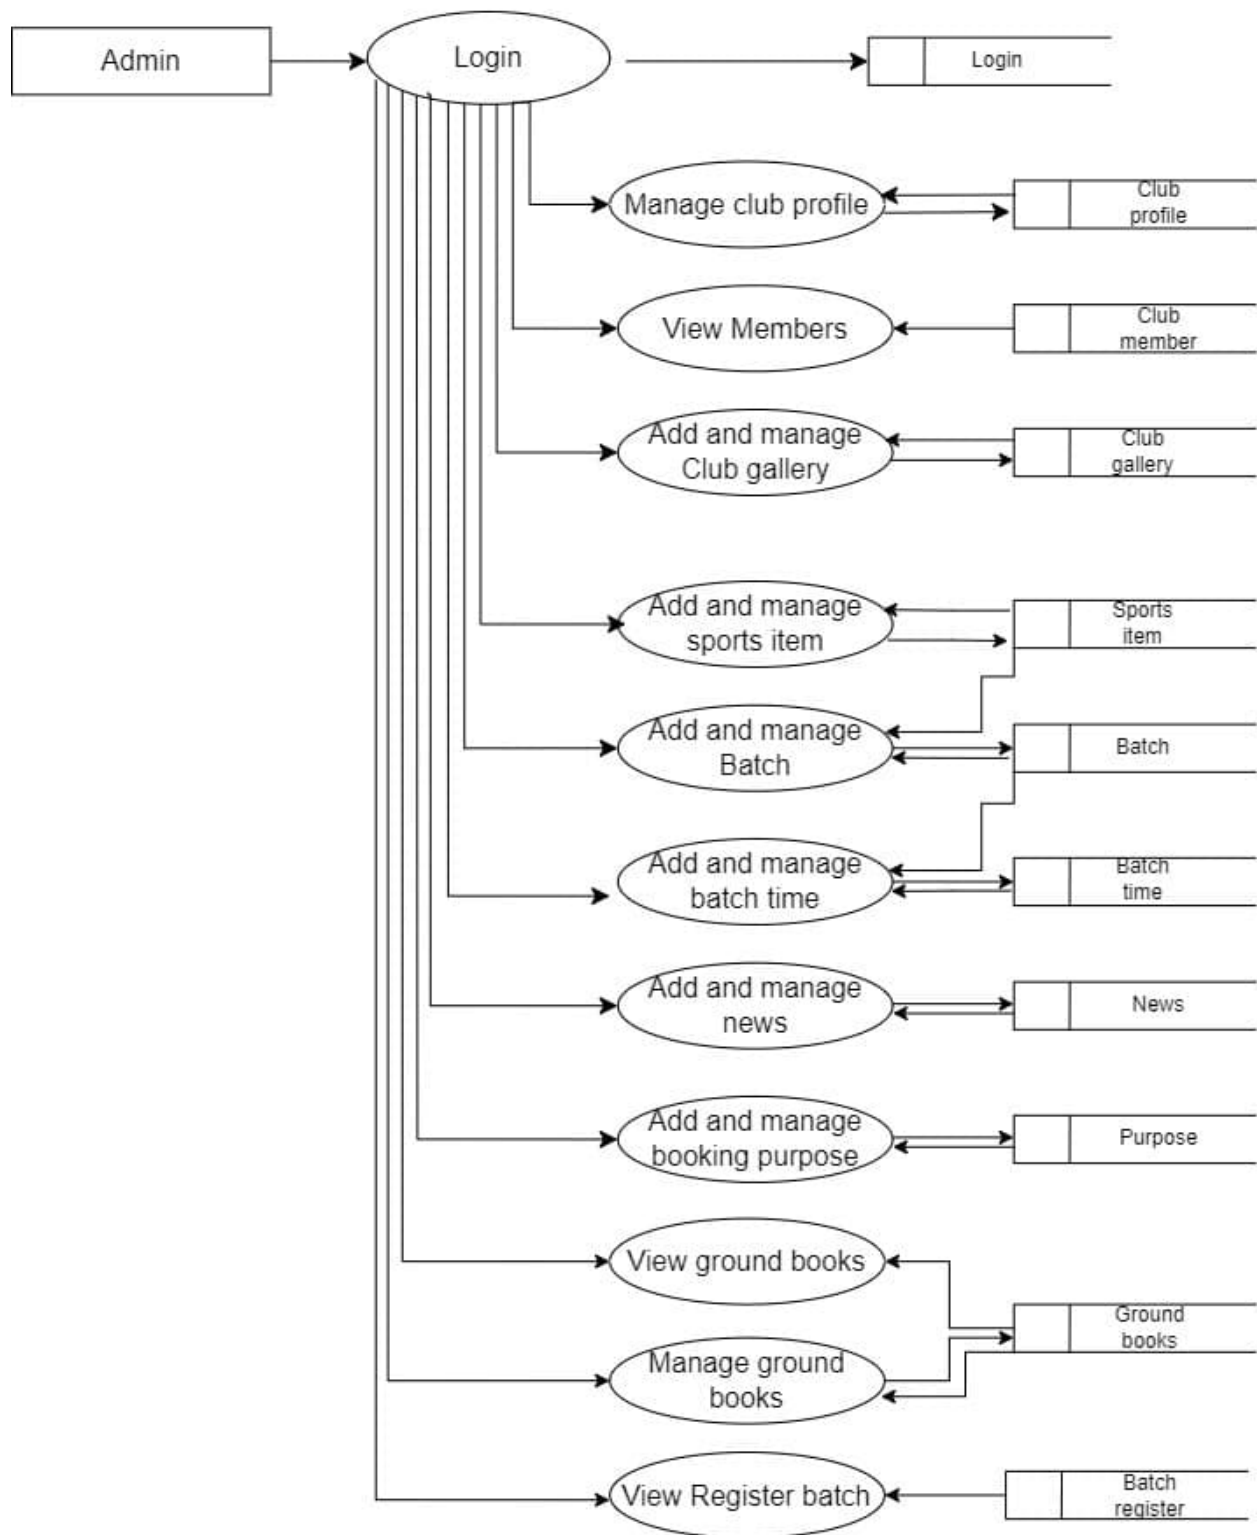

*We propose to build a software system that can efficiently handle and manage various activities of a club and all these activities will be happening under the supervision of the administrator. The administrator account controls everything.*

*Club management project is designed with the motive of managing a club. This software system consists of various online booking and management functionalities needed by a club. It provides various options like ground bookings, member registrations, notice posting, member registration, batch registration and more. This software system assures efficient management and maintains the functioning on a club. The project consists of the following features:*

Level 0

LEVEL 1

LEVEL 2
